

# Joel Muigai

Software Developer

## Profile

I am a well renowned software developer. I have mainly been focused on web and mobile application development with over 2 years experience in the field. I have worked with technologies such as Node js, Angular js, Python and Django to create dynamic web applications, as well as Python Kivy to develop robust mobile applications. I have also worked in the sales and customer service throughout my career.

## Employment History

### Customer Service Agent at Startimes Media

November 2019 — March 2020

I was responsible for handling client complains, handling client transactions and giving directives on changes made in the company

### Freelancer, Nairobi

December 2018 — July 2019

Being a self taught web and app developer, I was able to secure remote projects for which I ultimately made deliveries to different clients and within their suited deadlines

### Technical Assistant at Resound Energy Solutions, Nairobi

February 2018 — December 2018

I was responsible for the maintenance of company equipment

Occasionally I participated in the company's major sale where I distributed products to various clients as requested

### Supervisor at Gamers Lounge, Nairobi

January 2017 — January 2018

I was responsible for running a play area in Nairobi. My duties included ensuring the company equipments were maintained as up to date. I was also actively involved in handling client transactions on a day to day basis
